

Zagros Polymer
Polyethylene pipes and fittings

Zagros Polymer Company is one of the pioneers in the polyethylene pipe and fittings manufacturing industry in Iran. The company commenced its operations with the aim of meeting the needs of various industries, especially in the fields of water and wastewater, agriculture, and construction, and quickly gained a special position in both domestic and international markets. The company continues to invest in research and development of its products with the goal of improving the quality of life and enhancing the country's infrastructure.

Zagros Polymer Company manufactures its products under strict quality control, adhering to both national and international standards. The company holds ISO 9001, ISO 14001, and OHSAS 18001 certifications, reflecting its commitment to quality, safety, and environmental protection. Besides fulfilling domestic needs, the Zagros Polymer brand also exports its products to neighboring countries and other international markets. The company is expanding its global market share through a strong distribution network.

Polyethylene pipes and fittings are recognized as one of the most crucial components in piping systems across various industries. Due to their unique properties, including corrosion resistance, lightweight, and long lifespan, these products are widely used in water supply, sewage, agriculture, and construction projects.

Products

- Polyethylene Pipes

- **Water Supply Pipes:** Designed for transporting drinking and industrial water.
- **Sewage Pipes:** Resistant to chemicals and high pressure.
- **Agricultural Pipes:** Suitable for drip irrigation and modern irrigation systems.

- Polyethylene Fittings

- Includes welded fittings, threaded fittings, and other necessary fittings for installing and operating piping systems.

- Specialized Products

- Includes pipes for specific industries, such as oil and gas, which require higher resistance.

Product Features

- **High Resistance:** Zagros Polymer products have extremely high resistance to pressure and corrosion.
- **Long Lifespan:** The pipes and fittings produced by this company have a long lifespan and high durability in various weather conditions.
- **Lightweight and Portable:** The lightweight nature of these products makes them easy to transport and install.
- **Eco-friendly:** The use of high-quality raw materials and sustainable production processes helps preserve the environment.

Advantages of Using Polyethylene Pipes and Fittings

- **Cost Reduction:** Lower maintenance costs due to long lifespan and high resistance.
- **Lightweight:** The lightweight nature of the pipes reduces transportation and installation costs.
- **Earthquake Resistance:** The high flexibility of polyethylene provides resistance against ground movements.
- **No Sedimentation:** The smooth interior surface of the pipes prevents sedimentation and reduces water flow restriction.

Zagros Polymer Company offers extensive after-sales services to its customers. These services include technical consultation, installation and setup training, and technical support throughout the product's lifespan.

. With several years of experience in the production of polyethylene pipes and fittings, Zagros Polymer is recognized as one of the reputable brands in this industry. The company, focusing on quality, innovation, and customer satisfaction, aims to enhance its service level and meet the growing market demands.
